Integrated Body Temperature Registration Solution

Full-field temperature measurement characteristics of thermal imaging, easy to screen temperature abnormal points in the area.

Real-time temperature response and real-time data analysis.

Supports compensation temperature and alarm temperature settings.

Facial recognition with mask detection.

High temperature mobile APP notification alert with staff detail or visitor information.

Integrated Flap Barrier or Turnstile Access Control.

How it works:

Screening → **Alert Detected**
Sound and Visual Alert → **Central Monitoring received the Alert** → **Instant Notification via Mobile App**
Location and Photo of Suspect

Suspect will be isolated
Identity of the suspect recorded

Prevention is better than cure
Early detection make a difference

A Covid-19 Prevention Solution
